Call for a Training Fellowship

Location: Fondazione Italiana Fegato (Italian Liver Foundation), Trieste, Italy

Duration: 5 months (possibly renewable)

Starting form: February 1st, 2018

Salary: 5.000€

Program Supervisors: Francisco Baralle, PI of the project
Claudio Tiribelli, FIF Scientific Director

Application DEADLINE: January, 24

A training fellowship position is available in the Basic Research Unit of Italian Liver Foundation, located in Area Science Park Basovizza, Trieste. The candidate will be part of the project "Splicing Factors: Mis-folding, aggregation and low tissue levels during aging, role in the onset of degenerative diseases", supervised by prof. Francisco Baralle.

We are seeking a skillful, student able to conduct experiments oriented to the study of the role of mis-folding and aggregation during aging.

The following skills are required:

- expertise in cell culture and tissue manipulation
- expertise in Real Time PCR and transfection
- Experience in Confocal Microscopy
- Computer skills
- Good level of written and spoken English

Interested candidates are invited to fill the application form attached and to send it, along with Curriculum Vitae with contact information to the following e-mail address: direzionefff@fegato.it. Selected candidates may be interviewed by the supervisors of the research program.
